This man is rather small of stature, fair nutrition, color fairly good.
Mentally - average only.
Sensation - normal. Nervous system: Presents no signs of any organic lesions. This man was wounded in right shoulder in Oct. 1917, shortly after being wounded he developed some Neurasthenic symptoms, but these have now entirely disappeared and ha there remains but a very slight degree of nervous debility, which is practically negligible for civil life.
He has a position awaiting outside for which he is adapted.
I would recommend his immediate discharge from the Army that he might take this opportunity to get re-established again in Civil

Denies ever having had syphilis nor obviously did he have any treatment. Had gonorrhoea 8 yrs ago and treated himself. No recurrence. He has a circinate raised red rash on chest upper part in front and between the shoulder blades and upper part of shoulders behind. Glands mucous membranes negative. Skin very oily. No scar on penis. The Wassermann Feb.7.1919 is confusing showing a 4 plus with the sensitive antigen and none with the otherless sensitive antigen. I incline to the belief that the rash is due to Gebarrhoea as if it were specific I would expect other sitgmata. I would Recommend another Wassermann to avoid accidents andif it is the same to allow the patient to pass under his own control.

Statement of the Soldier

(This is to be completed only in the case of the Soldier taking his Discharge in England.)
(Sections 1, 2, 5, and 6 are to be read to the Soldier.)

I, the undersigned M L Abbott 826066 have heard the description of my disability read, and am satisfied (~~or not satisfied~~) with it. (If ~~dissatisfied, statement should follow.~~) I complain ~~in addition of :—~~

Louis Abbott
Signature of Soldier examined.

Instructions to Medical Officers

Question 1.—State the disability in terms of a diagnosis, that is, a diagnosis of the existing condition as distinguished from the disease or injury which caused it. It should be noted that in medical cases the disability may be the actual disease; for example, Tubercle of Lung, Chronic Bronchitis, Myalgia, Gastric conditions and so forth. (Follow the nomenclature as laid down in the "List of Diseases" of 1915, and amended by A. C. I. No. 1587 of 1917.)

Question 2.—The cause of the disability when known should be stated and care should be taken to establish as correctly as possible the place and date of origin. This is important in view of the relationship of Questions 3 and 4 to Question 5.

Questions 3 and 4.—*NOTE*—By Active Service is meant Service with the Colours in Canada, the United Kingdom or elsewhere during the present war, (since the 4th August, 1914.)

Question 5.—MEDICAL HISTORY.—State concisely the essential points of the history of the case as supported by documentary evidence. If further evidence is considered necessary to complete the Medical History, the same not being supported by documents, this should be obtained by questioning the soldier, but should be distinctly shown as "Patient's Statement." It is considered advisable that these latter statements be grouped apart from the evidence supported by documents available to the Medical Officer.

Extracts should be made from all entries on the Medical History Sheet.

If answers to Nos. 2, 3 or 4 show that the Soldier is suffering from some condition which pre-existed enlistment, it is advisable that these answers be substantiated as far as possible by statements obtained from the Soldier showing history of previous illness or injury.

Question 6.—PRESENT CONDITION.—As this question is primarily intended for the Medical Officer's report, in answering show clearly the condition of the Soldier at the time of examination.

It is directed that the objective and subjective matter be arranged in separate groups. The objective matter is considered to be the more important, in that it consists of a statement of the Medical Officer's actual finding.

Specialists' reports bearing on the PRESENT CONDITION should be attached.

In addition to description of the disability, a report on "all systems" is required in order that the whole when completed may be a true pen portrait of the Soldier's condition.

The Medical Officer in charge of the case will fill out pages 1 and 2 of this Form. The original must be wholly in the handwriting of the Medical Officer. The copies may be typewritten but must be signed by the Medical Officer who must be responsible that these are true copies of the original.

Finally the O. C. Hospital or S. M. O. or an Officer delegated for such duty by the A. D. M. S., is required to sign a certificate at the bottom of page 2, which reads as follows :—

"I have satisfied myself of the general accuracy of this report and concur therewith, except....."

This is a most important part of the paper and one to which the attention of the Officers concerned should be frequently drawn as it is by such strict supervision that the accuracy and good results of Medical Board work can be assured.
