Date of commencement of leave granted for present disability 14-5-17.

Date on which placed on half-pay for present disability

The Board having assembled pursuant to order, and having read the instructions on the back of the form, proceed to examine the above-named officer and find that

this Officer has reported from hospital, He still has a cough and expectoration. Voice has recovered, he feels sick and dizzy. On examination of chest a few moist rales heard at the end of inspiration which is distant and cogwheel in character. There is a distinct area of dulness in mid axillery region from 6th interspace down.

Hospitals. Can.Fld. Amb. at Villers a bois. 17-4-17.
C.C.S. at Quartre Vignt. 17-4-17.
Duchess Westminster. 18-4-17.
3rd London General. 25-4-17.

The Board will classify the officer under one of the following categories, the probable period of unfitness for the higher categories being stated.

1. Fit for General Service — No. 2 months.
2. Fit for service in a Garrison or Labour Battalion abroad. *No officer likely to be fit for general service within six months should be classed in this category* — not applicable.
3. Fit for Home Service — No. 2 months.
4. Fit for Light Duty at Home — No. 2 months.
5. Requiring indoor hospital treatment—
   (*a.*) In an Officers' Hospital — -
   (*b.*) In an Officers' Convalescent Hospital — -
6. (*a.*) Fit for light duty at a Command Depôt — -
   (*b.*) Fit for treatment only at a Command Depôt — -
7. In very special cases such as tuberculosis leave not exceeding six months may be recommended by Medical Boards for special treatment, the Board giving detailed reasons for any such recommendation — -
8. Was the disability contracted in the service? — Yes.
9. Was it contracted under circumstances over which he had no control? — Yes.
10. Was it caused by military service? — Yes.
11. If caused by military service, to what specific military conditions is it attributed? — Exposure and infection.
12. If the disability was not caused by military service, was it aggravated thereby, and if so, by what specific military conditions?

I concur in the findings of the Board of Medical Officers here recorded.

1. In using this Form the "Instructions issued for the guidance of Medical Officers serving on Medical Boards" will be carefully followed.
2. The Medical Officer in charge of the case is responsible for the proper completion of pages 1 and 2 of this Form. The President of the Board of Medical Officers is responsible for the proper completion of the space, of page 3, reserved for recording the Proceedings of a Board of Medical Officers.
3. In answering the questions, Medical Officers will carefully obtain and record the officer's statements concerning his condition. They will distinguish observations made by themselves from hearsay. They will distinctly state the authority for statements not resulting from their personal observation; it must be made clear whether such statements are obtained from the officer concerned, from witnesses, or from documents.
4. If a complete answer to any question requires more space than that reserved for it, the answer may be continued on the blank space at the foot of this page.
5. The nomenclature of diseases to be followed is that described in "List of Diseases, printed in the order in which they appear in the Annual Report on the Health of the Army", published in London, (1915) by Messrs. Harrison & Sons.

Report of Capt. J. H. Elliott, Spadina Military Hospital, 4086-12-17
Toronto./

His present illness began about Christmas,1916, with cough and sputum, and quite high fever in April,1917. This occurred in France. He lost fifteen pounds at the time of being invalided home. At time of my first examination June,15th,1917, he showed evidence of old standing Tuberculosis, upon which was engrafted recent Bronchitis with slight ulceration of the Larynx, doubtless tuberculosis. The X-Ray plates taken at that time showed signs of old Tuberculosis in the lung, but slight recent recovery. Under Sanatorium treatment his cough has ceased. He has gained satisfactorily in weight, and is in fair physical condition. Examination of the chest reveals no adventitious sounds, and all the physical signs are those of healed lesions with slight dulness left apex, slight changes in voice sounds, slight flattening upper right side, with respiratory murmur somewhat rough.

I would consider his chest condition quite under arrest, and that he will improve quite as readily at home as under Sanatarium treatment. Further, that it is advisable for him to give up Sanatarium treatment at present. His disability is fully 80%. He should be re-examined, and disability re-estimated at the end of six months.
