Re the man marginally noted, I beg to report that he came to Ward 24 in a very stuporous condition, and seemed to understand but little of what was said to him.

In two days his mind became quite clear, and since then he has no complaints, except that of constant headache.

His Wasserman was negative.

He gives a history of having been struck across the head by the boom of a sailing-ship. Since then, on four different occasions, after drinking, he has suffered from lapses of memory.

For the last four weeks, has had, almost constantly, severe headaches

His condition has not yet been diagnosed, but we are getting an X-Ray taken, - and will have a Surgeon see him, as soon as this has been done.
