23/7/20																						flw I year case. Great loss of mandible from rt. angle — well up on ascending ramus of rt. side. Post. fragment firmly bound down & displaced in & up. Bone graft not practicable. Fracture also in incisor region not united but up displacement. Small bone dentures has been constructed to restore occlusion of left side. (This work depends solely for utility on few remaining teeth.) Small bridge on upper as indicated. Power of mastication almost negative. Anterior $\frac{1}{2}$ of tongue lost. This also lessens chance of mastication. Remaining fragment of jaw displaced to rt. side. Dental prognosis very bad.
