No. 651846-Pte. FARMER, T.

The marginally noted man complains of Palpitation of the Heart, pain in the praecordium, and general weakness.

Examination shows slight enlargment of the thyroid, well marked tremor of the outstretched fingers, eyes react to light and accommodation, teeth in poor condition.

Epitrochelar Glands, enlarged on both sides.
Wassermann not yet taken.

There is no Rhomergism and no area of anaesthesia can be found.

This is apparently a marked case of "Fear Neurosis" following his experiences in France, and I would advise his transfer to Neurological Centre, Toronto, for treatment.
