* Loss of teeth [illegible] subsequently after, active service, should be attributed thereto, unless there is evidence that it is due to some other causes.

Opinion of the Medical Board.

NOTES.—(i.) Clear and decisive answers to the following questions are to be carefully filled in by the Board, as it is essential that the Members of the Pensions and Claims Board should be in possession of the most reliable information to **enable them to decide upon the man's claim to pension.**

(ii.) Expressions such as "may," "might," "probably," &c., should be avoided.

(iii.) The rates of pensions vary according to whether the disability is attributed to wounds or injuries received or illness contracted, (1) in the presence of the enemy, (2) on active service. It is therefore essential when assigning the cause of the disability to differentiate between them (see Article 591 to 598 of the Canadian Pay and Allowance Regulations as amended G.O., 57, May 1st, 1915).

(iv.) In answering question 20 the Board should be careful to discriminate between disease resulting from military conditions and disease to which the soldier would have been equally liable in civil life.

20. (*a*) State whether the disability is the result of injuries received or illness contracted, (1) in the presence of the enemy, (2) on active service. — (1) No (2) Yes

(*b*) If due to one of these causes, to what specific condition do the Board attribute it ? — Diphtheria

21. Has the disability been aggravated by

(*a*) Intemperance ? — No

(*b*) Misconduct ? — No

22. Is the disability permanent ? — Not possible to state

23. If not permanent, what is its probable minimum duration ? — Not Applicable

To be stated in months.

24. To what extent is his capacity for earning a full livelihood in the general labour market lessened at present ? — Not possible

In defining the extent of his inability to earn a livelihood, estimate it at ¼, ½, ¾, or total incapacity.

25. If an operation was advised and declined, was the refusal unreasonable ? — Not applicable

Remarks.

Diphtheria Oct 1st 1916 followed by paralyaia of palate this has bxxxx entirely recovered. Bed sixteen days then up in chs r for one week. Then relapse and bed again for two weeks. Legs both weak but all movements present. Knee and ankle jerks absent. Pulse rapid and reduplication of 2nd on exertion.
