**REPORT OF THE  
INDIAN BRANCH  
OF THE  
DEPARTMENT  
OF THE  
MINISTER OF THE INTERIOR.**

*To His Excellency the Right Honorable The Earl of Dufferin, Governor General of Canada, & c., & c., & c.*

MAY IT PLEASE YOUR EXCELLENCY: -

I have the honor to transmit for the information of Your Excellency, the Report of the Deputy Superintendent General of Indian Affairs for the year ended the 30th June, 1873.

As the Report relates to transactions which occurred when the Indian Branch of the Department was connected with the late Department of the Secretary of State for the Provinces, prior to the establishment of the Department of the Interior, and many months before I assumed the management of that Department, I do not feel that it is necessary for me to make any comment on the Report.

*I have the honor to be, Sir,  
Your obedient servant  
DAVID LAIRD,  
Minister of the Interior.*

*INDIAN OFFICE, OTTAWA,  
DEPARTMENT OF THE INTERIOR  
March 18th, 1874.*

SIR, - I have, in accordance with the usual practice, the honor to submit the Annual Report on Indian Affairs for the year ended 30th June, 1873.

The details in tabular form, placed in the appendix, will be found to show the condition of the accounts with the various Indian Bands, with the different special funds, and with the Government, and likewise the receipts and expenditure during that period. The appendix likewise contains details of the educational institutions among the Indians, and established for their benefit; and also population returns, exhibiting the relative increase or decrease in numbers of the various Bands.

The gradual additions made to the funds, in the hands of the Government, on Indian account, has permitted, from the revenues derived therefrom, the extending of many advantages to those Indians, from the sales of whose lands and timber the capital has been created.

The capital derived from these sources was, on the 30th June, 1873	\$2,105,382 17
To which is to be added the capitalization of Annuities payable for cessions of Territory	704,7655 66
And making a total of	2,810,147 83

The interest and annuity monies divided among the numerous Bands entitled to participate in them (and separately altogether from the transactions with the Indians of Manitoba and the North West Territories, growing out of the Treaties of 3rd and 21st August, 1871, which will appear elsewhere), amounted to, combined with salaries, surveys and incidental expenses, \$190,339.53.

The amount received during the year on account of land and timber, was	\$65,246 77
Interest on Investments	150,972 62
Grants in aid of Indians of Nova Scotia and New Brunswick, and for blankets for aged Indians of Ontario and Quebec	8,300 00
Total	\$224,519.39

The quantity of land sold during the year was 27,282 acres.

The amount divided among the Indians, between July, 1872, and 30th June, 1873, exceeded, by the sum of \$5,862.04, that divided during the year which ended 30th June, 1871.

The annuities paid to the Indians of Manitoba and the North West during the year ending 30th June, 1873, was \$16,745.00.

It will be interesting, as respects the progress of education among the Indian people, to furnish in this place some particulars. In the Province of Ontario the pupils number according to recent returns, 1,307; in the Province of Quebec, 471; in the Province of Manitoba, 120. In Nova Scotia and New Brunswick, offers made by the Department to give support to Indian Schools, appear to have been ineffectual. The one at Bear River, Annapolis County, Nova Scotia, at one time sustained with Indian Funds, seems to have been discontinued. We are now willing to ascribe this to apathy on the part of the Local Agents.

In British Columbia, it is believed that the leading Religious Societies, who it was shown in my Report of last year were engaged in educating and civilizing the Indians, are continuing the same laudable efforts.

The intelligence of the Indians of that Province gives encouragement to the expectation, that with liberal encouragement, the Indians, who form so large a proportion of the population, may, as they are not deficient in

enterprise, be transformed into valuable members of the community. Superintendent Powell's General Report of last year will be found worthy of a reperusal; it discloses the evils of past systems, portrays the capabilities of the Indians, and the inducements which exist for a great effort to advance their condition.

The fact cannot be disguised that in too many quarters an intolerance of Indians as a race is continually manifested, and the limited number of acres which a humane care of them demands, are begrudged them; and efforts to effect their removal from the reserves guaranteed them by solemn treaty and contract are not infrequent. The knowledge which reaches them of attempts made to transfer them from their reserves to remoter localities, is to them both harassing and prejudicial. Fortunately, they are protected by Statute. But they are not unaware that law does not always remain the same.

A persevering effort has for a number of years been made to prevail with each head of an Indian family to establish a homestead, to be transmitted to those who succeed him at its head. The plan is now finding increased acceptance among those people. Its tendency is to elevate them in the social scale. Each has or can have the boundary of what thereby becomes his property defined by lines of survey. He acquires, which he had not before, a series of freehold; and he learns to attach to his position a respect which it had not previously, and thus an important step is taken towards assimilating the condition of the Indian people to that of those of other origins.

The transactions for acquiring the Indian title to lands in Manitoba and the North West were moulded on those which preceded them in the late Province of Upper Canada, and thus the inconvenience and danger of attempting to pass over the territorial rights of numerous bands, who might (had justice been withheld from them) have become formidable, has been avoided. Thanks to the Missionary Societies, the work of education had already been initiated, and the assurances given in the Treaties that the work of education would be sustained by the Government, has been to the required extent verified.

With reference to the promotion of agriculture among the Indians of that part of the Dominion, the supplies of Ploughs, Harrows, Spades, Hoes, Scythes and Axes, and Farming Stock, delivered to such as were prepared to take proper care of them, testify to the Indians, the fidelity with which all agreements will be carried out, and will enable them, from the produce of the soil, to subsist their families, independently almost of the game which formerly was almost their entire dependence and support.

In addition to those tribes of Indians with whom treaties in Manitoba were made, there was found to be a migratory Band of Sioux Indians, for whom it was deemed very advisable to make provisions. Their case being reported upon, locations of 80 acres to each family were authorized. They have proved themselves to be expert hands at harvesting, when employed as they have been by the White settlers. They, as a roving Band with no rights of soil (for such was a few months since the case), were becoming an object of anxiety, and their's would soon have become a sort of gipsy life, but for the timely grants of land which have been authorized by Order of Council. They have now strong inducements to conduct themselves well.

In regard to the Indian Affairs of British Columbia, it was hoped that the plans formed and concurred in by Order in Council for assigning to each Indian family a location of eighty acres, would have been carried into effect. Difficulties in the way of doing this have however interposed, but which is trusted may ere long be removed. For until the Indians are satisfactorily located on lands, and they are judiciously collected into communities, schools for their instruction and other ameliorative arrangements cannot properly be proceeded with. And further, that by limiting, as heretofore, the land to each family to a minimum quantity, agriculture can be nothing else than a mere farce, and it is in vain to tell those people to support their families by farming, unless land enough be allotted to each, out of which to make a farm.

It is with considerable satisfaction that we can refer to the continued successful management of the Industrial School near Brantford, conducted under the auspices and at the expense of the New England Society of London; and of that at Mount Elgin, sustained in a principal degree from Indian funds, and conducted by the Wesleyan Methodist Society. The Pupils from these and some other schools, exclusively for Indians, are qualifying the young people of both sexes for the useful avocations of life; and the extension of such establishments to other Provinces of the Dominion could not but prove an important boon to the different Bands for whose benefit they may be brought into existence.

It seems to my mind, that the training of some considerable number of young Indian people to industrial pursuits, and the following systematic processes for realizing objects

to be attained, are necessities to be supplied, if it be accepted as a duty that the Indian population are not to be left to stagnate, but must be improved, by introducing among them some such educational machinery, as public opinion everywhere proclaims must be provided for those who have a whiter skin than the Indian.

The claims of the Indians to liberal consideration, as respects their condition and their rights, and the obligation to promote their welfare, has now-a-days few advocates, and not a year passes but that attempts are made to acquire from them the little remnants of reserved lands which they occupy. There is among the Indians, it is to be admitted, as among many people of other origins, a great drawback to be contended with, and that is, with many of them an indifference about the future. The providing the necessities of life only just as they are required, seems to be their main concern. The tendency of agriculture, and in the pursuits of it, we are from time to time offering all the encouragement in our power, is to counteract those habits of improvidence; and by increasing the number of Industrial Institutions among them, and fostering those already established, the cultivation of the soil will, it is hoped, be intelligently carried on upon all the principal reserves. As one of the results of the Industrial Schools, the number of Indians who are occupied in handicraft employment is evidently increasing.

With regard to social and moral improvement, I believe that with the exception of some localities, where the Indians are specially exposed to injurious influences, owing to their proximity to towns where the laws which prohibit the sale or barter of intoxicating liquors to Indians are not respected, they are becoming more conscious of their responsibilities as members of society, decidedly orderly in their conduct, more industrious in their habits, and less addicted to crime; And with regard to the commission of crime, probably there are fewer instances of it than among an equal number of persons who are not of Indian blood.

From the population returns it will be observed that the sanitary condition of the larger proportion of the Bands is very satisfactory. These returns dispel the idea which did prevail very generally, that the Indian race was dying out. With better habitations, a sufficiency of the necessities of life, proper clothing, and suitable medical attendance, their physical condition is an improvement upon what it used to be. The amelioration of their state is doubtless also largely owing to the Christianizing influences brought to bear upon them.

In the disposal and management of the lands, which have been given up for sale, and nearly all of which is disposed of upon the express condition of actual occupation and improvement, there has been a fair degree of success, and the Local Agents and Superintendents have performed their duties relating thereto, satisfactorily.

The closing up of land transactions of many years, and the adjusting special claims, occupy unavoidably much time. The transfers of purchases, the management of the Timber business, and the apportioning of moneys for the various objects to which they are devoted, entail much correspondence, and render the business of the Indian Office increasingly onerous. But I can claim for myself and for the gentlemen serving under me, the merit of all being animated by a sense of duty, and having faithfully acquitted themselves.

The Land and Timber business of the current year afford promise of ample receipts from them. And the construction of Roads, through the instrumentality of those entrusted with the management of affairs, proceeded with in the Sangeen Peninsula, and on the Great Manitoulin Island, affording access to the lands still unsold, and the erection of two Flouring Mills and two Saw Mills on that Island have conferred great benefit on the settlers.

It is trusted that the construction of the Road which has been surveyed throughout the length of Batchawana Bay Reserve, to the North of Sault Ste. Marie, will be proceeded with during the approaching season, and that thereby the settlement of that extensive tract will be facilitated. This road must form an important link in a great highway between the Sault Ste. Marie and Thunder Bay, and the intervening Mining Districts, and will open the way to any such lands of fertile quality as may be traversed in its course.

*I have the honour to be, Sir,  
Your obedient humble servant,  
(Signed) WM. SPRAGGE,  
Dep. Supdt. Genl. Indian Affairs.*
