He will carefully discriminate between the soldier's unsupported statements and the evidence as recorded in the medical or other military documents bearing on the case. 7. PRESENT CONDITION. *(Give previous and present weight if likely to indicate progress of disability.)*

Patient is thin, and rather anaemic looking. His weight is the same as on admission (120 lbs) His present condition has been improving somewhat lately under treatment, but the Rash of Pyrexia Vulgaris has not yet cleared up, but is gradually spreading. in spite of treatment. There is an area of dullness left side of chest where lesions have coalesced. There are several scattered lesions over back also small area of right infra-scapular. Other Systems normal.

On account of the chronicity of the case and the length of time he has already been in hospital, I do not think he will be fit for service for more than six months.
