MEDICAL HISTORY OF AN INVALID

INSTRUCTIONS WHICH MUST BE READ BY MEDICAL OFFICERS

1. In using this Form the "Instructions issued for the guidance of Medical Officers serving on Medical Boards" issued by the B.P.C. and instructions issued by Militia H.Q., Ottawa, will be carefully followed.
2. The Medical Officer in charge of the case is responsible for the proper completion of Sections 1 to 17 of this Form and will obtain the signature of the invalid to the "Statement," page 3. The President of the Board of Medical Officers is responsible for the proper completion of sections reserved for recording the "Opinion of the Medical Board."
3. In answering the questions, Medical Officers will carefully obtain and record the invalid's statements concerning his condition. They will distinguish observations made by themselves from hearsay. They will distinctly state the authority for statements not resulting from their personal observation; it must be made clear whether such statements are obtained from the invalid concerned, from witnesses, or from documents Regimental or otherwise.
4. Special care is required in answering question 9. Read the questions carefully. All questions must be answered.
5. If space provided under any section is insufficient add another sheet. Such sheets must be initialled by Medical Board.
6. A note will be made of attached papers by the Medical Board under the section "Opinion of Medical Board."
7. Under no circumstances may information other than that in sections 7, 8, 9 and 10 be communicated to the invalid, directly or indirectly.
8. The nomenclature of diseases must be followed, if possible, as described in "List of Diseases" printed in order in which they appear in the Annual Report on the Health of the Army, published in London (1915) Messrs. Harrison & Sons. #10 MD.

8. Present disability— (Here state the exact nature of the disability resulting from the disabling conditions: e.g. (*a*) Weakness—slight, moderate, marked, etc; (*b*) Loss, complete or partial, of an organ or member, or of its functions; (*c*) Necessity for rest of the body, or of some of its parts, for therapeutic reasons; (*d*) Any other restrictions in choice of occupation.)

1. WEAKNESS OF LEFT ARM

2. IMPAIRMENT OF FUNCTION OF LEFT FOREARM AND HAND.

9. Present condition—(*a*) (Before completing this section the invalid should be stripped, and subjected to a thorough physical examination. Important, to be a full description of the present disabling condition, or conditions only. "History" must be recorded in Section 10. Describe all abnormalities, anatomical and functional, contributing to present disability; objective findings to be stated first, then subjective findings.)

Objective findings - Greater part of left pectoralis major muscle missing and over this area is a deep scar. There is wasting of muscles of arm due to disuse. Circumference right arm 9½ inches, circumference left arm 8¼". Abduction of left arm limited by scar over pectoralis major muscle to 90 degrees.
2. Left forearm and hand - Elbow solid fibrous ankylosis angle of 110 degrees. Can get hand to within 18 inches of mouth. Hand midway pronation and supination - there is only about 10 degrees movement of pronation and supination possible. Wrist can be extended into line with forearm only, and can be flexed only 10 degrees from this. Hand cannot make a fist, or flex thumb into palm of hand. He can however grasp a fork handle with hand. Grip of right hand 90 K, grip left hand nil. These changes due to prolonged sepsis following wound, and resulting in adhesions. Other systems normal.
Subjective Symptoms - No pain. He complains only of weakness in arm and forearm, and of limitation of movement as above described. He says that the weight of his overcoat on his shoulder makes it ache.

(*b*) Has the invalid now any affection of the following systems, not described in Section 9 (*a*) above?
(Answer Yes or No.—if the answer to any part is Yes, give a brief description of the present condition.)

Nervous System NO Cardio-Vascular System NO (If pulse rate is abnormal, B. P. will be taken.) Genito-Urinary System NO (Albumen and Sugar will be excluded.)

Special Senses NO Respiratory System NO Integumentary System NO

Disturbances of Mentality NO Digestive System NO Muscular System NO

Osseous and Joint Systems NO Any other general condition Nothing but as described in 9(a)

10. (*a*) History (of the condition referred to in Section 9 (*a*).)

Feb. 17/1918 shell wound left arm. The arm became very septic, and elbow, wrist and hand joints were affected by sepsis (M.H.S.)
Feb. 18/1919 he came here and March 27/1919 had head of radius removed to improve supination and pronation. Today he was seen by Lt.Col. Galloway who recommended him for final board, as further treatment would not, in his opinion be of material benefit.

10.— (*b*) (Here give a complete history, as obtained from invalid, with dates of origin, of any affection from which the invalid, has suffered either prior to or since enlistment, and not included in Section 10 (*a*).)

In civil life (Patient's statement) Nothing.
In the service (MHS) shows no other illness. Patient states that he had diphtheria and recovered completely in Dec. 1916.

(*c*) (Here give a description of wounds, scars and deformities.

See Sec. 4.F.

11.—(*a*) Did the disabling condition have its origin before enlistment? 1.2. No.

(*b*) If so, has it been aggravated by Service? (If aggravated, give a description, as far as it is possible to do so, of the disabling condition at time of enlistment.)

1.2. Not applicable.

12. Was the disability caused, or aggravated; (*a*) by intemperance, or improper conduct; or (*b*) by unreasonable refusal to accept treatment? 1.2. (a) No. No. (b) No.
The regimental documents will be referred to.
(If the answer is in the affirmative, state in percentages, to what extent the patient is incapacitated by that causation or aggravation. In answering this question, conduct sheets should be considered. If treatment has been refused, the circumstances surrounding the refusal should be described on page 4.)

13. What is the probable duration, in months, of the disability or of each of the disabling conditions, if there is more than one? 1.2. Permanent.

14. Treatment (Case reports, general or special, should be secured and attached where possible.)

Operated in France day he was wounded, and again in England for drainage. March 27/1919 had head of radius removed to improve supination. This not successful. For the last two months has had massage, radiant heat, and gymnasium exercises.

15. Is further treatment in hospital, convalescent home, etc., likely to be of material benefit?
(If the answer is "yes" state nature of treatment required and probable duration)

No.

16. Can the former trade or occupation be resumed? (If not, briefly state why) No - Cannot do heavy work with left forearm.

17. Recommendations Discharged from army.
To take a course in vocational training.

A MacKinnon Capt Can Med
Medical Officer by whom the case is brought forward.

STATEMENT OF THE INVALID

(Sections 7, 8, 9 and 10 are to be read to the invalid and either "satisfied" or "not satisfied" struck out).

I, the undersigned William Adams have heard the description of my disability and present condition read, and am satisfied ~~(or not satisfied)~~ with it. (If dissatisfied, statement should follow.)
