having an operation, and would like the boards opinion.

This man had GSW of left calf (healed). There is considerable shortening of the tendo achilles.

J. Barrow
Capt. Camc.

Capt. Little (orthopedic surgeon) recommends forcible stretching under anaesthetic; failing this he recommends a lengthening operation by partial division of tendon.

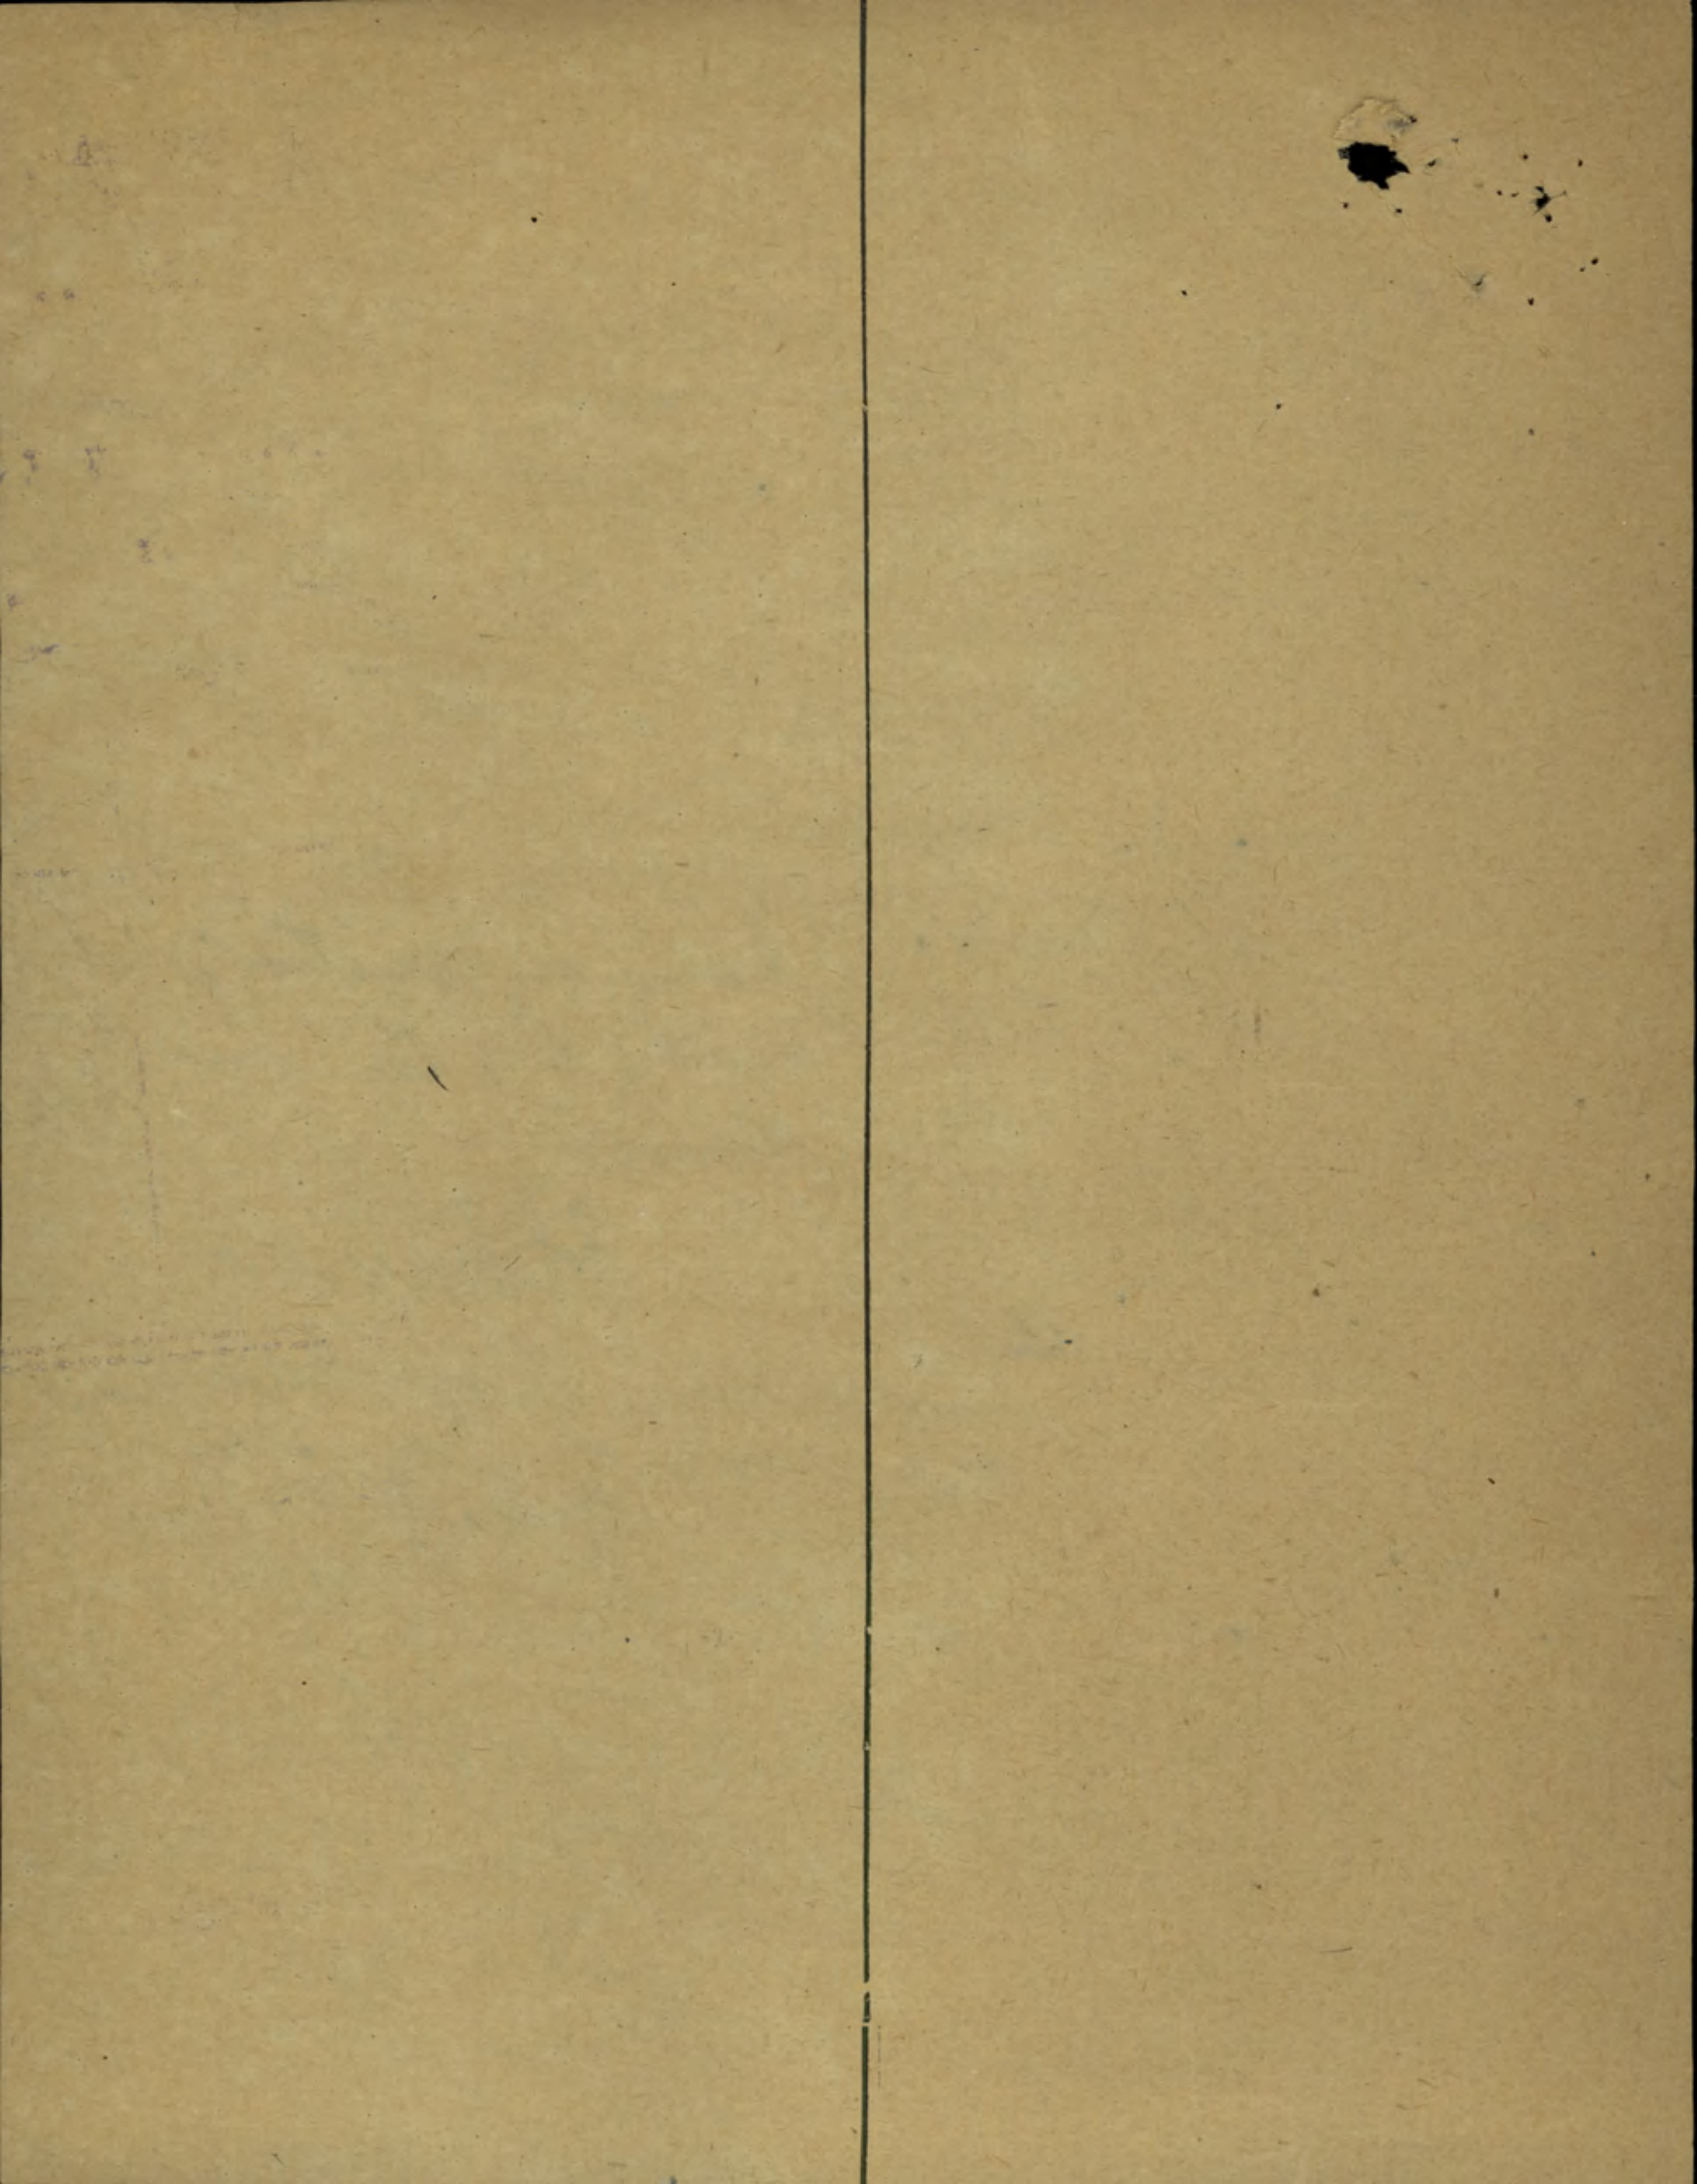

M.C. Div II.

The Board thinks an operation is warranted but the man of course does not necessarily have to have it.

The patient says he was formerly advised against

I do not see any merit in any more of it.
