This man has been suffering from shell shock recieved in april last. He has been very nervous and apprehensive and sleeping very little and very restlessly. The night before last he was found about the lines shouting and throwing stones, he was taken in charge about midnight and screamed and fought all night, apparently thinking he was in a bombing attack. The next day he did not appear to have much recollection of what he had done but said he dreamed he was being bombed.
He does not use alcohol and has usually been very quiet in his manner.

I, the undersigned,.....understand the nature of the treatment which it is recommended that I should undergo and refuse to accept it.

Patient is improving and is not so nervous as he was, but he still gets severe headaches and his sleep is uncertain, sometimes he is wakeful at other times he has bad dreams. He is unable to concentrate on anything for long as he readily gets upset in his nerves, but he has begun to take more interest in the workshops. Marked tremor of the hands. Alimentary, Circulatory, and respiratory systems normal. Slight tendency to flat foot.

[After describing all abnormalities, anatomical and functional, contributing to present incapacity (see section 11) state whether such incapacity is directly due to (*a*) weakness, (*b*) loss (complete or partial) of an organ or member or of its functions, or (*c*) to the necessity for rest of the body or of some of its parts.]

Worked in automobile factories previous to enlistment in Nov. 1914. Went to France with 18th Batt= in September 1915 where he received two small shrapnel wounds, one in right hand, the other in right temporal region. Shell shock came on in April 1916. Admitted to Moore Barracks C.H. with letter from M.O. 39th Res. Batt= stating that on the night of 8-10-16. he had been found about the lines shouting and throwing stones and had to be restrained. In the morning he had little recollection of what he had done but said he had dreamed he was being bombed.

Opinion of the Medical Board.

NOTES.—(i.) Clear and decisive answers to the following questions are to be carefully filled in by the Board, as it is essential that the Members of the Pensions and Claims Board should be in possession of the most reliable information to **enable them to decide upon the man's claim to pension.**

(ii.) Expressions such as "may," "might," "probably," &c., should be avoided.

(iii.) The rates of pensions vary according to whether the disability is attributed to wounds or injuries received or illness contracted (1) in the presence of the enemy, (2) on active service. It is therefore essential when assigning the cause of the disability to differentiate between them (*see* Articles 641 to 648 of the Canadian Pay and Allowance Regulations).

(iv.) In answering question 20 the Board should be careful to discriminate between disease resulting from military conditions and disease to which the soldier would have been equally liable in civil life.

20. (*a*) State whether the disability is the result of injuries received or illness contracted, (1) in the presence of the enemy, (2) on active service. (1) yes (2) yes

(*b*) If due to one of these causes, to what specific conditions do the Board attribute it? Stress of Campaign

In defining the extent of his inability to earn a livelihood, estimate it at $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, or total incapacity.

25. If an operation was advised and declined, was the refusal unreasonable? not applicable

26. Do the Board recommend

(*a*) Fit for duty? —

(*b*) Fit for base duty? —

(*c*) Invalided to Canada? —

(*d*) Discharge as permanently unfit? yes

    (To include full description of present disabling condition or conditions, and of the immediate and direct cause of incapacity, *i.e.*, debility, breathlessness on exertion, necessity of treatment by rest, etc.)

This patient was in the front line trenches when he was struck by pieces of shell in the head and right hand and was rendered unconscious. There is no disability resulting from the wounds, but his memory does not go back further than the journey from England to Canada, all that happened between that date and the time he was hurt is lost. Patient still gets severe headaches at times, his sleep is uncertain, sometimes he is wakeful and at others he has bad dreams. Unable to concentrate on anything for long as he gets readily upset in his nerves. Marked tremor of the hands which prevents him taking up a manual occupation such as automobile work or carpentering, and his restless nervousness will not allow of his taking a school class. Alimentary, circulatory and respiratory systems normal. Tendency to flat-foot.
