Moist rales over R. lung both back and front. Bronchophony over R apex behind. Weight now Stationary no night sweats. Poor appetite. Cannot Eat Either fish or meat.

9-12-18 Specialist Report

Personal history - Likely had Measels - States he was gassed April 1917. Expansion Left lung being not quite as good as Right - interspaces same both sides - Percussion note slightly impaired behind mid scapular area - Palpation. negative. D'espine slightly positive to 4th dorsal vertebra - Voice sounds altered over left chest below clavicle - No adventitious sounds except over left bronchoid - Heart negative. There are no definite signs of Tuberculosis. What changes there are is indicated by Clinical exam^n & X ray.

I would interpret this as probably due to the Bronchitis & Bronchiolitis following gas poisining - his general condition is fair and after the 18 months he has had in hospital, he is more likely to improve further outside. He is desirous of taking a course under the D.S.C.

Opinion of the Medical Board.

NOTES—(i.) Clear and decisive answers to the following questions are to be carefully filled in by the Board, as it is essential that the Members of the Pensions and Claims Board should be in possession of the most reliable information to **enable them to decide upon the man's claim to pension.**

(ii.) Expressions such as "may," "might," "probably," &c., should be avoided.

(iii.) The rates of pensions vary according to whether the disability is attributed to wounds or injuries received or illness contracted, (1) in the presence of the enemy, (2) on active service. It is therefore essential when assigning the cause of the disability to differentiate between them (*see* Articles 641 to 648 of the Canadian Pay and Allowance Regulations).

(iv.) In answering question 20 the Board should be careful to discriminate between disease resulting from military conditions and disease to which the soldier would have been equally liable in civil life.

20. (*a*) State whether the disability is the result of injuries received or illness contracted, (1) in the presence of the enemy, (2) on active service.

25. If an operation was advised and declined, was the refusal unreasonable? Not applicable

26. Do the Board recommend

(*a*) Fit for duty? no

(*b*) Fit for base duty? no
