(1) No

(2) It may have been an old condition aggravated by strain.

13 What is his present condition?

Weight should be given in all cases when it is likely to afford evidence of the progress of the disability.

He has an Aortic Diastolic murmur. The action is fairly regular at present time. He complains of a pain in left chest a great part of time. Compensation is good, no swelling of lower limbs. Complains of shortness of breath upon least exertion. He says he weighed 148 upon enlistment, he now weighs 158 lbs.

Opinion of the Medical Board.

NOTES.—(i.) Clear and decisive answers to the following questions are to be carefully filled in by the Board, as it is essential that the Members of the Pensions and Claims Board should be in possession of the most reliable information to **enable them to decide upon the man's claim to pension.**

(ii.) Expressions such as "may," "might," "probably," &c., should be avoided.

(iii.) The rates of pensions vary according to whether the disability is attributed to wounds or injuries received or illness contracted, (1) in the presence of the enemy, (2) on active service. It is therefore essential when assigning the cause of the disability to differentiate between them (*see* Article 591 to 598 of the Canadian Pay and Allowance Regulations as amended G.O., 57, May 1st, 1915).

(iv.) In answering question 20 the Board should be careful to discriminate between disease resulting from military conditions and disease to which the soldier would have been equally liable in civil life.

20. (*a*) State whether the disability is the result of injuries received or illness contracted, (1) in the presence of the enemy, (2) on active service.
