MEDICAL CASE SHEET.

Lieutenant L.C.McKay, 28th Canadian Battalion.

Age - 28

Service 2/8/12th, F.S. 6/12ths.

5th March, 1918.

He was admitted to this Hospital in the 22nd December, 1917, from the Prince of Wales' Hospital. There he was being treated for a wound in the thigh.

He was transferred to this Hospital on account of his mental condition. He had ideas od persecution and fears of impending calamity. After admission here he was very depressed, his memory poor, concentration bad and mentation slow. He took very little interest in his surroundings and was very apprehensive. He made gradual improvement but at the end of January he became very emotional and seemed to be troubled about religious matters. He has now sufficiently recovered to lead a normal life. He has improved in physical health, he has put on weight, he is sleeping well and goes out on parole with other patients. he is still, however, somewhat slow , dull and obduse.

(Sgd.) N.H.Oliver, Major R.A.M.C.,
C. i/c Latchmere.

6-3-18

Prince of Wales' Hospital, Marylebone.

Admitted as a transfer from Latchmere.

Has had a wound upper part of right thigh. Metallic F.B. remains.

7-3-18

There appears to be a foreign body in the region of the trochanter, but there is not definite evidence that it is causing any inconvenience. In the meanwhile this Officer's mental condition entirelt precludes the idea of any operation.

(Sgd.) V. Warren Law.

To see Dr. Campbell Thomson.

8-3-18

Is slow in speech - says he sleeps badly and is depressed and cannot concentrate his mind. In view of the recent mental break-down and his present condition, I should recommend his being examined by a Board with a view to being invalided from the service.

1. In using this Form the "Instructions issued for the guidance of Medical Officers serving on Medical Boards" will be carefully followed.

2. The Medical Officer in charge of the case is responsible for the proper completion of pages 1 and 2 of this Form. The President of the Board of Medical Officers is responsible for the proper completion of the space, of page 3, reserved for recording the Proceedings of a Board of Medical Officers.

3. In answering the questions, Medical Officers will carefully obtain and record the officer's statements concerning his condition. They will distinguish observations made by themselves from hearsay. They will distinctly state the authority for statements not resulting from their personal observation; it must be made clear whether such statements are obtained from the officer concerned, from witnesses, or from documents.

4. If a complete answer to any question requires more space than that reserved for it, the answer may be continued on the blank space at the foot of this page.

5. The nomenclature of diseases to be followed is that described in "List of Diseases, printed in the order in which they appear in the Annual Report on the Health of the Army", published in London, (1915) by Messrs. Harrison & Sons.

Disease (1). G.S.W. Right Buttock. (2) Confusional Insanity.

March 5th

He was admitted to this hospital on Dec. 22nd. 1917 from the Prince of Wales Hospital. There he was being treated for a wound in the thigh.

He was transferred to this hospital on account of his mental condition. He had ideas of persecution and fears of impending calamity. After admission here he was very depressed, his memory poor, concentration bad and mentation slow. He took very little interest in his surroundings and was very apprehensive. He made gradual improvement, but at the end of January he became very emotional and seemed to be troubled about religious matters. He has now sufficiently recovered to lead a normal life. He has improved in physical health, he has put on weight, he is sleeping well, and goes out on parole with other patients. He is still however somewhat slow, dull and obduse.

Officer in charge, details of

6. March 1918. Admitted as a transfer from Latchmere.
Prince of Wales H.
Nervous

Healed wound upper part of R. thigh. Retained F.B. remains.

March 8th There appears to be a foreign body in the region of the buttock but there is no definite evidence that it is causing any inconvenience. In the meantime this officers mental condition entirely precludes the idea of any operation

* The first and last entries will be signed, and transfers from one Medical Officer to another, attested by their signatures.

20.12.17.	About 8 pm I saw this pte. who was in a curious mental condition stating to me that "he was in fear of being assassinated for looting" but would not say by whom. He was very afraid if going up to his room (3rd floor) and could hardly be induced to do so to the tropical ward on the ~~ground~~ first floor where he stated he felt safe. He was put to bed in Pyjamas & his clothes were detained & took right from me as he himself requested "à guard". His appearance was of a furtive hunted nature & was continually looking into dark corners & behind doorways for an imaginary assailant. He can appear to me to be one of early dementia præcox.
