**ANNUAL REPORT  
OF THE  
SECRETARY OF STATE  
FOR THE YEAR 1868**

*To the Right Honorable Sir JOHN YOUNG, Baronet, G.C.B., G.C.M.G., Governor General of Canada, & c.*

**MAY IT PLEASE YOUR EXCELLENCY,**

I have the honor to lay before Your Excellency the following report of the affairs of my Department, in conformity with the 41st section of the 31st Victoria chapter 42, which provides for its organization.

My department consists of four principal branches, namely: 1. the Secretary's, properly so termed; 2. The Registrar's office; 3. Indian affairs; 4. The Ordnance Lands. The three last have each al head who manages them, and the Secretary's office is under the immediate direction of the under Secretary of State, who has the general superintendence of the Department.

Having made this general division of the duties to be performed, I endeavoured to assign to each branch only a sufficient number of officers to perform them in an adequate manner, and I am happy to say that by this means I have been able to effect a saving of a considerable amount, in addition to that which was effected when the Act of Confederation was put in force. Accordingly, I was able to dispense altogether with the services of one clerk in the Branch for Indian affairs; of one clerk whose duty it was to attend to the regular and correct distribution of the Official Gazette and of the statutes; and of another in the Register Office and further to effect a saving of nearly \$1000 by combining the duties of the clerk of the Crown in Chancery with those of the Deputy Registrar General, the aggregate amounting to a diminution of expense of at least about \$2,900.

The reduction of the number of persons employed and therefore of the amount of salaries, was also extended to the contingencies of the department which have amounted to about one third less than the sum voted by Parliament to meet them int the year 1867 - 8 and which will not exceed \$8,000 for the year 1868 - 9 being about two thirds less than the estimate.

At the Secretary's office, properly so termed, have been received, in the 18 months ending on 1st January last 7133 letters, either single or containing documents, that is to say for the year 1867 - 8, 4,682 letters, and for the last six months of 1868, 2,451 letters.

Compared with the year preceding Confederation the figures are as follows:

Letters received	Numbers
In 1866 - 7	3534.
In 1867 - 8	4682.

The number of letters written and despatched has been as follows, for the 18 months ending on the 31st December, 1868: -3741.

Compared with 1866 - 7 the figures give the following result.

*Letters written and despatched.*

In 1866 - 7	1739
In 1867 - 8	2392

The duties of the Registrar's office are as follows: - 1. The engrossing of Patents of Indian Lands and Ordnance Lands, and of all commissions issued under the great seal and the Privy seal. 2. The registration at length of such patents and commissions, as also of Patents of inventions and of other documents. 3. Preparing copies of Patents, Commissions or other documents already registered; 4. The preparation of Indexes and of copies of documents required by Parliament, by the Council, by other departments and by individuals. 5. The safe keeping and classification of the archives. 6. Preparing copies of records transmitted by other departments to that of the Secretary of State for the purpose.

The branch charged with the affairs of the Indian Lands has the management of the affairs, lands and funds of the Indians. I have instructed the Deputy Superintendent to prepare for me a report of the affairs of his branch, together with tabular statements as complete as possible to give an exact idea of the situation of the Indian Tribes, of the extent of their domain, of the funds belonging to them, and of their income and expenditure. This Report follows that which I now have the honor to present, and is as complete as it could be made. Your Excellency will perceive that most of the tribes, have a sufficient income, but that those of Nova Scotia and New Brunswick have no means of acquiring the education necessary to enable them hereafter to share the blessings of civilization. It would, in my own opinion, be expedient to grant the sum of \$1000 to each of the two Provinces to procure for them this advantage.

The experience which I have gained since I took in hand the superintendence of the affairs of the Indians has convinced me that the time has come for facilitating the enfranchisement of a great number of those Indians who, by their education and knowledge of business, their intelligence and their good conduct, are as well qualified as the whites to enjoy civil rights, and to be released from a state of tutelage. For this reason, I propose, with Your Excellency's sanction, to submit to Parliament a measure which would attain that object, and would be more easily carried into effect than the present law respecting the Indian tribes of the Provinces of Ontario and Quebec.

The fourth branch of my Department, is that of the Ordnance Lands. The head of that branch has forwarded to me a report which I had instructed him to prepare, and which will explain to Your Excellency the present condition of those lands; the amount which they have produced, and the actual revenue arising from them. It will show you that this revenue has been more than doubled in twelve years, without taking into account that a large portion of them is now occupied, either by the military authorities or the militia, for the purposes of defence, or by public institutions, for other purposes of general interest, among which may be mentioned the site of the present Parliament House and Departmental Buildings. This Report is annexed to the present one.

Before concluding, I ought to add that the officers of my Department and more particularly the under Secretary of State and the heads of branches have fulfilled their duties with zeal, assiduity and exactness.

The whole is respectfully submitted.

*HECTOR L. LANGEVIN,*  
*Secretary of State*

Department of Secretary of State of Canada,  
Ottawa, 10th April, 1869.

*DEPARTMENT OF SECRETARY OF STATE*

*INDIAN BRANCH.*

*Ottawa, 2nd April, 1869.*

SIR, - In accordance with your instructions, I have the honor to submit the following Report, relative to Indian Affairs for the period commencing 1st July, 1867, and terminating 30th June, 1868.

The Indian Office on its disconnection from the Crown Land Department upon the latter being removed from Ottawa, in the year 1867, underwent an important change, and new duties and responsibilities devolved upon its officers. Coupled with this was a change which I had been for some years anxious to see accomplished, namely the placing of Indian monies direct and immediately to the credit of the Receiver General, on account of Indian funds, upon their being paid in instead of their being first deposited to the credit of the Crown Lands Department, and mingled in the Bank with Crown Land Receipts; and at subsequent dates transferred to the Receiver General, for the benefit of the Indians.

The new system thus accelerates the proper disposition of the monies, and also renders it less difficult to bring the balances in the books of the Indian Office, and in those of the Finance Department, into agreement the one with the other.

It is obvious, however, that while an improvement, it entails upon the Accountant the responsibility and the whole of the onus which had been previously shared by the Land Department.

There is another deviation from former practice which has thrown additional duties both upon the Accountant and Deputy Superintendent since the first July, 1867. I allude to the present mode of making all payments by cheque issuing from the Indian office instead of as originally from that of the Receiver General.

A further change, adding also to the work of the Indian Office has been the drafting of descriptions for patents formerly carried on in the Crown Lands Department, the engrossing from which description has of late been done in the office of the Registrar General.

The Indian Office Staff has nevertheless had no addition made to it, so that the capacity of the gentlemen composing it has been tested to the utmost.

In the management of the Indian lands the object has for several years been steadily kept in view, of inducing actual settlement, thus promoting the great agricultural interests of the country, while giving an additional value to sufficiently contiguous unsold lands; and furnishing also from Indian funds substantial aid towards opening out leading roads.

Urgent complaints having been made that settlers in the Saugeen Districts were hemmed in by unoccupied lands of absentee purchasers, the resumption of a large number of lots upon which none but the first instalments had been paid, and the period for the remaining payments had expired was effected in the spring of 1867. This proceeding has opened for actual settlement some of the most desirable lands in that part of the Province of Ontario, and which have been freely purchased by persons proposing to farm in that quarter.

The easy terms of payment by five instalments are well adapted to the agricultural class of purchasers, and admit, too, of better prices being realized. The selling on time instead of all cash down affording an accommodation similar to that, to which in transactions one with another they are accustomed and is therefore the more acceptable to them.

The lands resumed and reopened for sale bring the disposable lands in the Peninsula up to 240,000 acres.

In reference to the construction of roads in the Saugeen Peninsula, by the co-operation which had been arranged between your department and the municipal authorities, the assistance supplied from Indian funds has resulted in the opening out of leading roads having a commencement upon the Own Sound and Saugeen gravelled road, and which have been carried northward for up into the township of Albemarle. This work while offering inducements and valuable facilities to the settlers in affording access to the lands does unquestionable promote the sale of those still disposable and we make the calculation that the outlay is soon repaid from the earlier, larger and better sales which are

in consequence effected. The contemplated continuation of the main line of road to the northern extremity of the Peninsula for which the estimated cost has been provided for by you under sanction of an order in Council cannot fail to attract settlers. Licensed surveyor Charles Rankin computes that

upon this continuation, there will be about 200 farm lots of fair quality. The road will terminate at the safe and convenient harbor of Tobor Moray, distant about 25 miles from Thomas Bay and about 5 miles more from Heywood Sound, generally known now as "South Bay," on the great Manitoulin Island. It is anticipated that when settlement shall have sufficiently progressed upon the island and the northerly coast of Lake Huron, the route up the Peninsula, a distance of somewhat over 50 miles, shortening as it will for a winter transport of mails, the journey as now made around the eastern coast of Lake Huron, (for a considerable distance a desolate region) by about 150 miles, will become a great highway to the mining districts, the Sault Ste. Marie and the Red River country. (The Ontario and Huron and Bruce railway lines will form the first link in the chain of communication.) It is believed that the traverse from Tobor Moray to the Island, can be passed by a suitable screw steamer throughout probably the whole winter. The interval as it is understood being seldom so obstructed by ice, as to prevent a steamer adapted for winter navigation making the passage.

An examination of the Continuation of the line of road with a view to locating it to the best possible advantage, which it is expected will prove it to be advisable to deviate in some degree from the line run under the name the Bury Road, when the Northern townships were laid out in survey, was commenced last autumn, and it is trusted that contracts for making the road will be entered into early in the coming season.

It may be proper to state assistance has also been given in the construction of one wharf and landing place on Colpo's Bay, on the North side of the township of Keppel; and another at the village of Wiarton. The steamers touching at these places admit of supplies for the new settlers being the more conveniently and less expensively conveyed, and also for produce being carried to market at Owens Sound, the county town.

The construction of roads on the Manitoulin Island has likewise engaged your attention.

Two contracts entered into with T. Herrick Esq., surveyor and engineer, have been satisfactorily carried on, and one of them completed. The first section from Little Current now village of Shaftesbury to the village of Sheguiandah, a distance of rather more than 9 miles, and the second from the last named place to Manitowaning about 12 miles more, have been certified by Superintendent Plummer as satisfactorily constructed, and appear to be excellent roads of their class, well drained, and the culverts, crossways, and bridges will planned and built. A branch road from that line to Michael Bay on the southern coast of the Island is in course of construction, under Mr. Plummer's supervision. The latter road which leads to the vicinity of Messrs. Lyon and White's Mill, will afford additional facilities for settlement. Mr Herrick who explored the line and located it, describes both lines explored by him as passing, upon the departure from the main line, through some miles of excellent land. Thin occurs a level limestone plain, extending about two miles, succeeded by a tract of about two and a half miles in length, of "rich land heavily timbered with maple, basswood, "beach, pine, cedar and oak." Mr. Herrick remarks in some spots the fires have burnt off fallen timber "many acres of land require only the removal of a few scattered logs to each "acre to afford rich and thoroughly cleared farms." He continues, "on nearing the town "line of Tehkumah, a rich and heavily timbered country is entered on; which extends over "the Southern portion of sand field and entirely across Tehkumah until within about three "miles of Michael Bay.

I considered it advisable to insert these extracts that through the medium of this report such useful particulars calculated to inform the public mind as to what has been done in Indian affairs, and what the prospects are resulting therefrom, might be to some degree disseminated.

The nine townships upon the island which have been surveyed, consisting of Billing, Shegueandah, Howland, Bidwell, Assiginach, Tehkumah, Carnarvon, Campbell and Allan (under the charge of Mr. Plummer, the successor of Mr. Dupont) contain such a proportion of agricultural land, with considerable quantities of other land adapted for pasturage, (cattle do remarkable well upon the island) as to present advantages; enhanced by the island being less remote from the mining regions than the main land, of which it is trusted many individuals about to seek for land for settlement will avail themselves, for the completion of the roads will now enable them the more readily to visit the lands open for sale.

In the vicinity of the Sault Ste. Marie and Batchewana, and Goulais Bay, no steps

have yet been taken to open roads, as the prospects for disposing of lands in the hands of the Local Agent have not appeared to warrant an expenditure for that object.

The transfer of the Indian Affairs of Nova Scotia and New Brunswick to the Government of Canada has occupied as much attention on the part of your department as the limited amount of information available, has admitted of.

It would seem that no progress of importance has yet been made in prevailing with them to assent to forming themselves into communities similar to those which have long existed in Ontario and Quebec, where occupying farms or village lots they enjoy, in settled and permanent habitations, many of the comforts and advantages of civilization, combined with systematic and continuous education, and the pastoral care of religious instructors.

This has been carried on with comparative ease with little aid from the Public chest. The revenues derived from invested Indian monies and annuities having supplied the required amount that nothing entitled to the name of revenues is derived from them; and the Parliamentary Annual Grants in the one of \$1,300 and in the other \$1,200, are hardly sufficient to relieve the pressing wants of the more indigent people, furnish medical attendance to the sick, and some clothing and blankets to those who most require them; and likewise supplies of seed grain to the few who have hitherto planted some of the land belonging to them. It should be the object of the Department to elevate the condition of those people, and the population return which will be found appended to this report will shew the number of Indians in each of those Provinces and afford data to compute the amount required to assist them in any effectual degree.

The alternative presents itself either of allowing those Indians to continue in their present unprogressive state or to make a philanthropic effort to bring them up, to at least, the standard of the more advanced Indian communities in the Provinces of Ontario and Quebec; where in several bands, agriculture is the main support of their families, although as yet not managed, but in limited instances, with the requisite skill. Nevertheless the training of the younger members of those bands is producing some satisfactory results and the formation of an Agricultural Society among the Six Nation Indians indicates an appreciation of good farming. Among the same people temperance societies have been some years in existence.

And the cause of good order is no doubt gaining ground, although occasionally interrupted, as might be expected in a settlement where the numbers approach three thousand, by the misconduct of persons with ill regulated minds: and the same with similar numbers of white persons is unfortunately continually witnessed. However, the present when compared with the former condition of those people affords encouragement to attempt the amelioration of the state of the Indians in the Maritime Provinces.

With reference to the Indians within the Province of Quebec it is requisite to state that the annual Grants for seed grain and the purchase of agricultural implements have, as authorized by Order in Council, been made in such a manner as to benefit very considerably the people for whom such aid was intended. And in the appendix will be found in detail the various sums allotted from the Lower Canada Indian Fund for those objects, and likewise for the relief of the Indians on the North shore of the Lower St. Lawrence and Gulf. those in the vicinity of Lake St. John, and likewise those in the Restigouche, and the vicinity of the Bay of Chaleur, the township of Maria, and also other localities.

There would seem, from the reports of the Agent, M. White, to be an increasing disposition on the part of the Indians, for whose benefit the lands in the Township of Maniwaki, on the River Gattineau and River Désert, were set apart, to avail themselves of the opportunity of taking up lands, and becoming settled there; and the establishment of schools both there and at Golden Lake, affords inducements thereto which the Indians are appreciating. The schools among the Iroquois of St. Regis, the Hurons of Lorette, the Abenakis of St. Francis, and also three schools at the Lake of Two Mountains, it will be perceived, on reference to the Tabular Statement marked M, are reasonably well attended, as are also those at the River Désert and Golden Lake, considering that the Indian population at the two last named places are but now settling down into communities, several of the families connected with which settlement resort to their hunting grounds at certain seasons of the year. There is reason to believe that there is general evidence of progress among the Indians of the Provinces of Ontario, Quebec, and improvement in their habits of life. A portion of this is

undoubtedly due to the personal influence of the clergy Who minister among them, exercised as it is for the repression of intemperance and vice, and for, the promotion of industry and good order. An evidence of this will be found in the population return marked L, showing that in twenty-two settlements there is an increase in numbers, and in two only of those from which returns have been, received, is there a decrease. The sanitary condition of the settlements is beyond doubt much better than it was some years since. One cause of this is that the contagious diseases, such as smallpox, which have at times swept off whole families, have, of late been guarded against; and at periods sufficiently near to each other it is our practice to require professional men to make so general a vaccination as to leave little room for apprehension of a repetition of such visitations. And the cause is the improved mode of living in comfortable habitations, better diet, and better clothing, all of which assist in diminishing the number of cases of pulmonary disease to which the Indians when in semi-civilized state become liable.

It will be desirable to allude to the extensive fires in the woods, and especially those on the Manitoulin Island, which occasioned during the last year, suffering to many Indian families.

But the assistance in supplies, furnished by the Department, mitigated in a very important degree the misfortune which befel them.

I proceed now to refer to the receipts and disbursements during the past financial year, but giving in the first place, the amount in full, of fresh sales effected during that period.

New sales, between 1st July, 1867 and 30th June, 1868, payment for which except in regard to small parcels of land, and lots sold at twenty cent per acre is received by five Annual instalments.

Total of Sales	\$54,561 19
The total amount from all sources placed to the credit of Indian funds during the period referred to was	\$182,627 50
which may be placed under the following heads,	...
Receipts, from land and timber	\$41,501 49
Interest on investments	\$101,016 01
Annuities and grants	\$40,120 00
The payments and expenditure have amounted to	\$147,142 10
comprehended under the following heads.	...
Interest money and annuities periodically distributed among to the Indians	\$128,338 89
Grants towards school teachers salaries, and school buildings	\$2,155 24
Clergymens' salaries	\$2,555 24
Superintendents and medical officers' salaries, paid chiefly from funds belonging to the various bands; to interpreters, chiefs, councillors and others; also payments; to old and infirm persons to, whom the bands of which they are members have voted pensions	\$1,050 00
Construction of roads and other work	\$2,965 50
The Investments on the 1st July, 1867, bearing interest, amounted to	\$1,778,665 69
The amount at the credit of Indian funds on the 1st July, 1868, after deducting the payments and expenditure for the year then concluded,	\$1,808,261 69

It will be understood that the expense of surveys the construction of roads, special relief to various bands of Indians, assistance in the erection of school, buildings, and to other objects, diminished considerably the balance which would otherwise have been added to the invested funds.

With reference to provisions for ameliorating the condition of the Indians of Nova Scotia and New Brunswick, the amounts granted in the last Bill of Supply unsupplemented as formerly by aid from other sources, are entirely inadequate.

And I would suggest that a sum in each case not less than \$2,500, be hereafter appropriated.

Detailed information similar to that contained in former periodical will be found in the Appendix to be attached hereto in the statements marked consecutively from A to B.

It is proper to refer to such Indian Reserves in the Province of Quebec as it is anticipated will for the chief part be opened for settlement. There are the reserves in the Township of Viger near Isle Verte, in the County of Temiscouata, and Ouatouchouan, on Lake St. John Count, of Chicoutimi; Negotiations with the Indians owning which have been opened, with a view to the lands being yielded up and sold for their benefit, after providing for such families as have made improvements. In each, there is a fair proportion of land suitable for settlement.

With regard to the Indian lands at St. Francis, Yamaska, some of the most valuable of which had been taken possession of by white settlers, an inspection has been made, and the requisite steps taken to secure satisfactory payment for them. Many complaints having been made by the Iroquois of Caughnawaga of the intrusion of persons not of Indian origin, and some of whom plundered their lands of its timber, & c., others who illegally vended spirituous liquors, active measure were adopted for their removal and for the termination without delay of the abuses complained of.

It may be advisable here to make reference to the misunderstanding at the Seigniory of the Lake of Two Mountains. The bands of Iroquois and Algonquin Indians settled there, entertained the impression that they had rights in the soil. An examination of the title given by the French Crown to the gentlemen of the Seigniory of St. Sulpice, and also of different statutes since passed by Parliament, has proved that the Indians have in that Seigniory no rights whatever in the soil.

In the measures taken to remove the mis-apprehension the required explanations were given.

It having been found that the statutes in existence relating to Indian affairs required improvements for promoting the general welfare of the Indians; it is trusted that the new measure now in preparation, under your direction, will be found sufficient to meet not hitherto adequately provided for.

All which is submitted.

*W. SPRAGGE,*

SECRETARY OF STATE'S DEPARTMENT,  
(Indian Branch)  
April 8th, 1869

*To the Hon, Hector L. Langevin, C.B., Secretary of State, Canada.*

*DEPARTMENT OF THE SECRETARY OF STATE,  
ORDNANCE LANDS BRANCH,  
OTTAWA, 15 March, 1869.*

SIR,

1. I have the honor to submit for your consideration, a report to present date, on the Ordnance Lands in the Provinces of Quebec and Ontario, which under the provisions of the British North America Act, 1867, have become the property of the Dominion of Canada, and by the Act 31 Vict., Cap. 42 are placed under the management and, direction of the Department of Secretary of State.
2. For the better understanding of the duties of this office, as reorganized and now administered, I beg leave, to wit, to lay before you a summary, as brief as I can make it, of occurrences relating to the acquisition and management of these Ordnance Estates which will introduce, secondly, a further report on the transaction of the last eighteen months.
3. By the Act 19 Vict., Cap. 45, known as the "Ordnance Lands Transfer Act," passed 19 June, 1856, the Ordnance properties enumerated in the 2nd Schedule of the Act were transferred to the Province of Canada, to be used, leased or sold, to aid in the support of a Provincial Militia and Police. On the 11th September, 1856, an order in council was passed in relation to the management of the Ordnance lands and the Ordnance canals, and on the 15th September I was appointed Ordnance Lands Agent.
4. The Ottawa and Rideau canals, which constitute the "Ordnance Canals" had been before, actually handed over to the Province of Canada, on the 1st October, 1853. The Province assumed the Canal establishment on the Imperial footing, and maintained it, at the imperial rate of payment, until the Act of 1856 confirmed the transfer legally. On my appointment, I was ordered to report upon the whole, and to devise a system calculated to simplify the management, both of the lands and canals, and to reduce the staff and lessen the expenses.
5. The suggestions of the report then made, dated December 1856, were adopted by order in Council of the 5th March, 1857, by which the superintendence of the canals and of the engineering works thereof, devolved to the department of Public Works, leaving the lands alone to the management of the Ordnance Lands Agent.
6. It may be well to add here, with reference to the profitable, but unemployed water powers on the line of the Rideau navigation, that it was found that they were, in all cases, connected with important engineering works, and still more, dependent on the available supply of water, under the ever changing conditions of succeeding seasons. It was, therefore on like suggestion, further determined in Council, that the water powers should also be placed in the hands of the department of Public Works, with such additions of land as might be required for their proper development. It was also understood that the rents of these water privileges were to be divided between the Department of Public Lands and the Department of Public Works.
7. Under these arrangements therefore my duties were confined to the administration of the Ordnance Lands, comprising 91,236 acres, scattered in varying quantities over the outskirts of both Provinces, from Penetanguishene to Amherstburg in the west and north, from Fort Erie to Fort George on the south, from Isle aux Noix on Lake Champlain to Fort Ingall on Lake Temiscouata, and including the seigniorie of Sorel, the "Bytown Estate," which comprises two thirds of the present city of Ottawa, and the lands on the line and on both sides of the Rideau navigation, 126 miles in length.
8. It was thought advisable, to realize, as soon as possible, by the sale of such portion of these lands as might be safely disposable, but in making this disposition it became neces-

sary to act with caution and with a prudent regard to eventualities. In the peaceful aspect of human affairs, at that time, war had become, almost an obsolete idea, yet, it could not be ignored that these Ordnance properties had been acquired and held for military purposes, and that a portion of them might eventually prove more valuable and more directly useful for the defence of the Province, if retained, than by contributing, when sold, to the support of the Militia.

9. In this view it was decided not to sell lands which might possibly be required for the future defence of the country, and which circumstances might compel the Province to resume, either at an advanced price, or burthened with claims for compensation. Guided chiefly recollections of the past, it was determined to preserve intact defensible positions at Penetanguishene, Point Edward, Sarnia, Fort Malden, Amherstburgh, Fort Erie, and Fort George, Navy Island on the River Niagara, at London Toronto, Fort Wellington, Prescott, (in Ontario), Isle aux Noix, St. Johns, Chambly, Laprairie, the Barracks at Three Rivers, and Fort Ingall on Lake Temiscouata, all in the Province of Quebec.

10. The course of events since 1856 has justified those precautions, since that time Sarnia, Amherstburgh, Windsor, on the western frontier, Fort George and Fort Erie, London, Toronto, Fort Wellington, Prescott, Isle aux Noix, St. Johns, Chambly, Laprairie, and Fort Ingall in the east, have all been reoccupied militarily, and have helped to protect the country from aggression.

11. Looking in the same direction, and with the same object in view, Penetanguishene and Isle aux Noix were converted temporarily to the purposes of Juvenile Reformatories, and Fort Malden in Western Canada, and St. Johns in the eastern Province, were made use of as Asylums for the Insane. It enabled the Province for a present and useful purpose, to keep in repair buildings, which on an emergency, could be restored promptly to their original destination, and here likewise, events have borne witness to the prudence of the precaution.

12. But the reservation of these properties exclusively for military objects, deducted in proportion so much from the convertible value of the Ordnance Lands and it added considerably to the expense of maintenance. For some years the salaries of caretakers amounted to \$2,000 per annum, but as occasion offered, this expense was steadily reduced; at I present we have but one caretaker receiving 50 cents per diem.

13. It remains now to be shewn what has been done with the remaining Lands not required for purposes of defence. From the first outset, it was seen that in dealing with them whether in country parts or in towns, as farm lands, or town lots, or wharf lots, much circumspection was necessary. They could not be dealt with as wild and unoccupied Crown Lands, free from all preceding obligations or engagements, but as estates which had been vested by Act of Parliament in a corporate body known as the "Principal Officers of Her Majesty's Ordnance." They had accumulated in course of time. Part had been acquired under the Treaty of Paris, 1763, part by purchase some was hold under letters patent, and some under license of occupation from the Crown. The Province accepted of the transfer of these properties, liable to the legal acts and obligations of our predecessors. The 6th section of the Act of Transfer expressly provided that these Ordnance Lands were to be held "subject to all sales, agreements, leases, or agreements for lease already entered into with or by the principal officers of the Ordnance."

14. Relying upon this proviso in the Act from the time of my appointment, claims and applications poured in from different parts of the country, all urgent for immediate settlement. An impression appeared to have obtained that these lands had been transferred to the Province, for distribution among claimants generally, and in consequence pretensions, some of them very unreasonable were revived, which had been often and long before, settled by law or by the proper authorities. Appeals were constantly. made beyond law, to the equity of the Crown. It was found that these lands had, to a considerable extent been occupied, in larger or smaller proportions, sometimes on annual lease, sometimes by sufferance, very often on verbal engagements or understandings, pretended or implied, to which prescriptive or presumptive rights were unduly ascribed. All these applications, however, were in reality, appeals to the justice of the Government, and all alike prima facie was entitled to the investigation which all have received. It became necessary to inquire into the circumstances of every case, and of very numerous conflicting cases, before it could be pronounced how far the Government was or could be bound to use the words of the Act, by the engagements or agreements of. their predecessors, "the Principal Officers of Her Majesty's Ordnance."

15. These retardments have continued, though partially surmounted, and still continue to exist. Hundreds of such cases had been discussed and disposed of, when the approach of confederation, and its actual advent, and the removal of the Seat of Government created an unavoidable pause in the despatch of office work, and led to an accumulation of cases which awaited decision and received the early and rapid attention of the Secretary of State. Of these cases a large number already reported on, were disposed of forthwith, many are in process of settlement (some involving claims, for money of considerable magnitude). All that we know of have been carefully considered, and are now in a shape, either admitting of decision, or inviting the opinion of the Law officers of the Crown.

16. A large majority of these troublesome questions have arisen in the city and in the vicinity of Ottawa and on the line of the Rideau navigation. That part of the city which lies north of Wellington and Rideau streets was formerly the property of the Ordnance authorities and known as the "Bytown Estate" It consists of the Lots A and B in Concession C, of the Township of Napean, contents about 415 acres, and was purchased in 1829 by the Earl of Dalhousie from Hugh Fraser, Esquire, Prothonotary of Three Rivers, in the name of the King. It has been for the most part divided and set off in town lots, a considerable portion has been sold and granted in fee simple, other portions have been leased for periods of 30 years, on leases renewable at the option of the holder. The Government of the Dominion holds for the sites of Parliamentary and Departmental Buildings, about 70 acres of land worth, as prices rule in Ottawa at least \$8,000 per acre. The rental of the City of Ottawa in 1856 amounted to \$8195.06. Many Lots then held on lease, but open to redemption, have been redeemed and the capital passed to the credit of the Militia and, Police Fund. Other lands or lots have since been disposed of so as to keep up and increase the income of the rent roll which for 1869 will equal at least a sum of \$11,036.86.

17. On the line of the Rideau navigation a large proportion of the lands disposable have been sold. It may be explained here that these lands consisted in parcels of various dimensions and of irregular shapes, acquired by the Royal Engineers from 1827 to 1832, for the use of the canal or to foreclose damages. These pieces of land amounted in all to 22,586 acres, of which 11,107 acres are given on the Ordnance Schedule at "left dry" and available. These lands are scattered along the whole length, and on both sides, of a navigation of 126 miles in extent. In process of time, from their situation in connection with the canal and the growing population of the surrounding country, they have all become valuable. All or very nearly all, became occupied, in process of time, partly by recognized tenants "at will," partly by squatters not recognized, but not dispossessed. All these people had lived on in the hope of acquiring the land each had occupied, or, as they term it, improved. At least nine hundred applications were preferred in writing for such pieces of land. From the first it was difficult to understand what was the legal character and force of the engagements or agreements, expressed or implied, existing between these parties and our predecessors, which had been entailed upon us by the 6th Sec. of the Statute 19 Vic., cap. 45; still more difficult was it to understand the conflicting claims and adverse pretensions which, in the course of years had grown up between the parties themselves and their neighbors, perhaps more legitimately established on contiguous lots. One enquiry was found to lead and to be dovetailed into others indispensable for the settlement of questions, often of trivial value, but complicated, and arising in fact, from a general disregard of the morality of lawful occupation; still, the man who held a rood of ground with his shanty and potato patch, had, with the children around him, as deep an interest in it as the neighbouring farmer who sought it as a means of access for his cattle to the water of the Rideau. All these cases, therefore, demanded and received equal and careful examination, and of them a large number have been investigated and disposed of since the confederation of the Provinces. It is satisfactory to know that in the settlement of these cases by this Department, not a single man has been dispossessed of his holding. Squatters have been converted into contented settlers, with equal benefits to public and private interests.

18. In the Province of Quebec the Seigniorship of Sorel is the most extensive of the Ordnance properties. It includes several important islands in the River St. Lawrence and contains 50,000 acres of land and 12,000 inhabitants. The censitaires or tenants paying rents number 3,000. The sum paid by these parties respectively, as rents are small. The whole revenue of the Seigniorship amounts to about \$2,400. This year, (1868,) the rents

actually collected amounts to \$2,280.80. At the time of the transfer man difficulties were encountered in the administration of this property. Our military predecessors, not conversant with French law, had been indulgent, and advantage had been taken of their generosity. Mutations, covert and disguised had taken place without their knowledge, which on the subsequent abolition of lods et ventes in the Crown Seigniories, were produced with confidence. Transactions of this nature promesses de vente had been multiplied, and upon conditions which remained unfulfilled, and which we as inheriting the "agreements" of our predecessors, were called upon to satisfy. This led necessarily to enquiries and to the discovery of large tracts of land which were found to be occupied, though unconceded, and so far unproductive of rents, while this illigitimate occupation caused contentions, ill-will and litigation among neighbours, which the Government was asked to abate, and which, indeed, the Government alone was capable of bringing to a peaceful issue. Our embarrassments were increased by the want of a plan of the Seigniorie, the last and only authentic plan having been destroyed by fire. These wants have been supplied by slow degrees, and there questions and applications having been reduced to an intelligible shape it has been in the power of the Honorable the Secretary of State within the last few months, after careful and patient examination of every individual claim, each involving questions both of facts and law, to bring a large majority of these vexatious cases to a satisfactory close.

19. Before proceeding further it may be well to introduce here a statement of the value of the ordinance properties, generally at the time of the transfer as derived, from documents furnished by the Ordnance Officer and Royal Engineer. The lands purchased and prices paid by the Imperial Government and the costs of buildings are given as follow:

Rideau Canal lands - Ordnance Schedule	£44,807	12	6 1/2
Lands bought for defence	340,000	0	0
Barracks, & c., present value	105,000	0	0

No monetary value is assigned to lands transferred as military properties in 1763 by or under grants from the Crown. By the Ordnance Schedule of 1856 the annual income derived from the Ordnance Lands, including the Bytown estate and the Seigniorie of Sorel was \$15,020.

20. It would be interesting for the sake of comparison, to establish precisely the cost's of the management and maintenance of these Ordnance Properties previous to the transfer from the Imperial to the Provincial authorities, but it has not been found practicable to do so with certainty. Judging from the expense assumed by Canada in 1853, and continued, though diminishing steadily, up to say 1858, the cost of management must have been equal to, from \$15,000 to \$16,000 per annum.

21. Since the transfer in 1856, that is to say during the first eleven years, the cost of the maintenance of the Ordnance Lands, including salaries of agent, clerk and caretakers, stationery, postage, repairs and several extensive and expensive surveys have amounted to \$85,182.99, or, at the rate of \$7,744 per annum. It may be said here that the ordinance lands have from the first, been self supporting never having cost the Province one dollar directly, and that up to 1867, \$220,524.98 net, had been contributed to the militia fund.

22. The receipts from Ordnance Lands derived both from sale and rents annually have been as follows:

From	5 November, 1856	...
to	31 December, 1857	\$21,822 93
...	31 December, 1858	15,127 50
...	31 December, 1859	32,213 68
...	31 December, 1860	26,210 49
...	31 December, 1861	23,100 52
...	31 December, 1862	22,181 61
...	31 December, 1863	21,965 88

...	31 December, 1864	25,211 29
...	31 December, 1865	28,172 58
...	31 December, 1866	42,259 79
...	31 December, 1867	47,441 70
...	31 December, 1868	38,307 27
...	...	\$344,015 24

23. On the 1st July, 1867, from the inauguration of the Dominion, the Ordnance Lands, previously under the direction of the Crown Lands Department of the Province, were transferred to the Department of the Secretary of State for the Dominion. The transfer then made under the authority of the Governor in Council was subsequently confirmed by the Act 31 Vic. cap 42. The impulse given by this change was at once seen in the immediate and increased activity imparted to this branch. The amount of business disposed of in relation to Ottawa the line of the Rideau navigation and the Seignior of Sorel, has been already adverted to, but the same influence was exercised as practically and to the same good end, from Penetanguishene to Amherstburgh, on the Niagara frontier, at Fort Erie, Toronto, Kingston, Prescott, down to Chambly, Laprairie, and Three Rivers in the Province of Quebec. The influence of the new state of things was further shown in the increased value of property generally throughout the Provinces and specially at the Capital. To meet an increasing demand, sales of building lots was ordered in Ottawa and elsewhere. The result is best shown by the returns.

24. Between 1st July, 1867 and the 31st December of the same year, sales were made to the extent of \$11825.18, and the receipts arising from instalments paid upon the last mentioned and previous sales, and from rents, amounted for the six months to \$25,971.40. From the 1st January to the 31st December, 1868, sales were made, chiefly of building lots, to the extent of \$38,460.25, and the receipts for the same period, comprising instalments on sales as above, and the proceeds of rents for the year amounted to \$38,307.27. Within the first months of the present year, 1869, sales have been made by public auction at Kinston, Toronto, Hamilton, Fort Erie, Amherstburgh, London and Penetanguishene which have realized \$31,367.18, the actually netted proceeds of which amount to \$5,204.28; and further sales of building lots, wharf lots and country lots in the vicinity of Ottawa produced on the 16th March last \$30,670.53, on which the paid up instalments produced a sum of \$2,559.55.

The whole sales for the three months amount to \$62,037.71, and the actual receipts to \$14,860.19, but the sum to be credited to the fiscal year beginning 1st July 1868, amount at the present date to \$34,493.38, and justifies the expectation that by the 30th of June next, the last day of the said fiscal year it will equal a sum of \$50,000.

25. The total results of sales made since the incoming of the Government of the Dominion, 1st July, 1867, amounts to \$112,323.14.

The total amount of receipts for the same period, and up to the present date is \$79,139.57.

26. This last amount of receipts must be understood to include capital as well as rents and interest, equivalent to rent.

The actual annual income derived from rents, or from interest equivalent to rent, for the year to end 30th June 1869, based upon the return for the preceding year, and on actual receipts since, may be estimated as follows:

Rental	\$17,154.86
Interest at 6 per cent. on, say \$250,000, passed to credit of Militia Fund	15,000.00
Interest on price of 70 acres of land assumed by Dominion Government for Public Buildings valued at \$8000 but put at \$2000, per acre at 6 per cent	8,400.00
...	\$40,554.86

27. The Ordnance Lands at the places hereinafter mentioned, which were considered to be saleable, without prejudice to the public service have been sold. and the proceeds realized or are in process of collection.

At Penetanguishene, except Juvenile Penitentiary and land surrounding.

At Amherstburgh, except Fort Malden and fifty acres of land around it.

At London, except the Barracks and the land surrounding.

At Toronto, except Victoria Square.

At Kingston, except a large part of Herchmer Farm under lease.

At Fort Erie, except the ruins of Fort Eric and land immediately surrounding.

At Pelham Farm, all.

At Burlington Heights, Hamilton, except Lot letter A.

At Prescott, except Fort Wellington and land surrounding.

At Ottawa, and on the line of the Rideau Navigation, except lots on Rear street and lots 34 and 35 con. A.B. Nepean, and some few other scattered pieces.

At Cornwall.

At Chambly, except Barracks and Parade ground, and Fort Pontchartrain.

Three Rivers under lease.

It is intended that the Department of the Secretary of State should retain possession of all the above properties until final payment of instalments due and until Letters Patent are issued to the purchasers.

28. The following properties will remain either in the temporary occupation of the Imperial Military authorities, or will be transferred to the Militia Department as relating directly to the Public Defence:

Ottawa, Parade ground, Maria street.

Chatham, Reserve.

London.

Toronto.

Kingston.

Prescott.

Laprairie, Barracks and Common.

St. John, Fort and reserve.

Isle aux Noix and Sonta River, Fort Lenox.

Chambly, Barracks and Fort.

Fort Ingall, Temiscouata.

28. It is proposed to transfer to the Department of Public Works of the Dominion,-  
The land occupied by the Parliament and Departmental Buildings.  
The Major's Hill and Plateau beyond.

29. A schedule accompanies this report, showing in detail the quantities of land and the condition of each Ordnance property on the 1st September 1856, and the present state and condition of the same on the 1st September, 1868, showing the mutations which have taken place in the interval, the amounts realized and the properties remaining unsold.

*I have the honor to be Sir,*

*Your obedient servant,*

*WILLIAM F. COFFIN,*

*Ordnance Lands Agent.*

Schedule of Ordnance Lands,  
29th September, 1868.

**SCHEDULE of Ordnance Lands, - 1st September, 1868.**
